PROFESSIONAL SUMMARY

Motivated and detail-oriented Full-Stack Web Developer with a Bachelor's degree in Computer Science and Information Technology. Experienced in designing and developing responsive web and mobile applications using modern technologies, with a focus on e-commerce and dropshipping store development. Skilled across the frontend and backend, database management, version control, and software development best practices. Passionate about building scalable solutions, learning emerging technologies, and contributing to innovative software development teams.

PROJECTS

School Management System — A complete web application for managing students, teachers, attendance, courses, and academic records.

Bus Booking App — An online transportation booking platform that allows users to search, reserve, and manage bus tickets efficiently.

Students Hub — A student community platform where users can share educational content, upload learning materials, and interact with other students.

Meal Planner App — A smart meal planning application that helps users organize daily meals, manage nutrition plans, and schedule recipes.

Nice Shore — A smart project combines a refined visual identity inspired by ocean and shoreline tones with a server that handles authentication, user management, and beach-related data.
